

Left: daily log returns of the S&P 500 and COMEX gold futures, last 2,520 trading days to Dec 2024.
Right: one replication of the simulation design (GJR-GARCH-t for X, GARCH-t for Y, calibrated on 2000-2024)
with constant zero correlation, same length. Days beyond the plotted range are marked at the edge with their value.
